

JASHWANTH A

Electronics & Communication Engineering Undergraduate

Ambur, Tamil Nadu | 9042740920 | jashwanth.a2006@gmail.com | linkedin.com/in/jashwanth-arul-b50603282

CAREER OBJECTIVE

Final-year Electronics and Communication Engineering student with hands-on experience in embedded systems, IoT, and computer vision, backed by a national-level internship at Bharat Electronics Limited and multiple award-winning hardware and software projects. Seeking an Electronics Engineer / Embedded Systems role to apply strong microcontroller programming, sensor interfacing, and firmware development skills, along with proven leadership in coordinating large-scale technical events.

EDUCATION

B.E. Electronics & Communication Engineering — C. Abdul Hakeem College of Engineering & Technology (Anna University) *Expected 2027*

CGPA: 8.1 / 10

Higher Secondary Certificate (12th) — T. Abdul Wahid Matriculation Higher Secondary School

Percentage: 76%

TECHNICAL SKILLS

Languages: Embedded C, C, Python, JavaScript, HTML/CSS

Embedded & IoT: ESP32, ESP8266, Arduino, Sensor Interfacing, Microcontroller Programming, GPIO, IoT Communication (HTTP)

AI / Computer Vision: Python, OpenCV, Machine Learning, Generative AI Prompting, Agentic AI Development, Deepfake Detection

Tools & Platforms: ThingSpeak, MongoDB Atlas, Vercel, GitHub, Arduino IDE, Cisco Packet Tracer, Xilinx, Wokwi, Blynk, Web Crypto API (AES-256), Lovable, Render, Google Flow, Stitch.

Core Domains: Embedded Systems, Internet of Things (IoT), Computer Vision, Real-Time Monitoring, Firmware Development, Hardware Debugging

PROJECTS

Hardware / Embedded

- IoT-Based Health Monitoring System — Real-time vital sign tracking using ESP32 and cloud data logging.
- Automatic Motor ON/OFF System — IoT-enabled automation for motor control with remote monitoring.
- Chromium Water Contamination Monitoring System (Ongoing) — Sensor-based filtration and monitoring for water safety.
- LiDAR & Radar-Based Object Detection System (Ongoing) — Collision avoidance system for railway safety using sensor fusion.

Software / AI

- Pixel-Level Color Detection Web App — Image analysis tool for precise color identification; State-Level Hackathon Runner-up, Naan Mudhalvan 2025.
- Deepfake Detection System — Computer vision pipeline using OpenCV and MediaPipe to identify manipulated media.
- Image Encryption Tool — Secure image encryption using AES-256 via Web Crypto API.
- Lead Capture Website for a Financial Banking Company — Web platform with automated lead export to database.

INTERNSHIPS

Strategic Communication Dept. Intern — Bharat Electronics Limited (Central Government Enterprise) *Jun – Jul 2026*

Digital Electronics & VLSI Intern — Codec Technologies (Online, Ongoing) *Jun – Jul 2026*

Data Analytics Intern — iStudio (Online) *Mar – May 2026*

VLSI Design with AI Advance — Internshala Internship Program (Online, Ongoing) *Jun – Jul 2026*

EXPERIENCE

Digital Marketing Head & PRO — VD Global Solutions (FinTech) *Current*

Website Developer — Financial Banking Company — Branch Head Team *3 Months*

CERTIFICATIONS

- Generative AI Mastermind — Outskill
- Oracle Certified Foundations Associate — Oracle
- Oracle Certified AI Foundations Associate — Oracle
- Embedded System Design using C Programming — Maven Silicon (1-month program)
- AI Upskilling Certificate: Technical Foundations — Qualcomm
- AI Upskilling Certificate: Hands-On Development, Model to App — Qualcomm

ACHIEVEMENTS

- 1st Prize, National-Level Symposium — Project Presentation, recognized for innovation in Embedded Systems.
- Runner-up, State-Level Hackathon (Naan Mudhalvan) 2025.
- Institutional-Level Winner & District-Level Runner-up, Ball Badminton (two-time).
- Convenor, National-Level Technical Symposium — successfully organized an event with 1000+ participants across colleges.
